How to Buy Your Own Home
Unit 2: Lesson 1: Deciding what you want

Comprehension check

Solve the problems.

1. Sue Johnson is thinking about buying a home with the floor plan shown in this lesson. She would like to put linoleum in the dining room. How many square feet would she need? _____

2. Sue would like to put wall-to-wall carpeting in the two bedrooms, including closets. How many square feet of carpeting would she need to cover both rooms? _____

3. Sue Johnson's mother found some wood tiles that she loves. But they cost $3.00 each. Each tile is 12 inches square. How much would it cost to tile both bed-rooms? _____

4. Sue would like to put a hedge across the front of her house. What is the total length of the front of the house? _____

5. How much will Sue need to subtract from the measurement in number 4 to allow for the space used by the front door? _____
